Omit calendar feature -- no obvious use case.

Reservation note takes one line.

Meaningful text in lieu of icons. Button convention used to make it clear that they're interactive elements.

Volume control layout matches established conventions and slider has some breathing room from other controls.

Simple, minimal text directions

Ask Us info is present.

If needed, Ask Us info could be moved to a physical sign in room to provide more room for directions.

System Off button is consolidated with other controls, padded to prevent accidental activation. Button color/texture cues communicate that buttons behave in "radio button" single-select manner.
