

Sleep Mode
while Reserved
(bar will be green if not reserved)

Home Screen
shows when power button is pressed to turn on screen
and when ever the Home Button is pushed in lower right corner

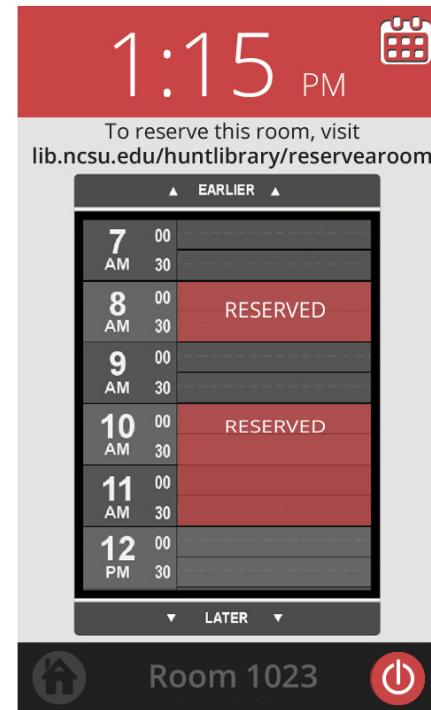

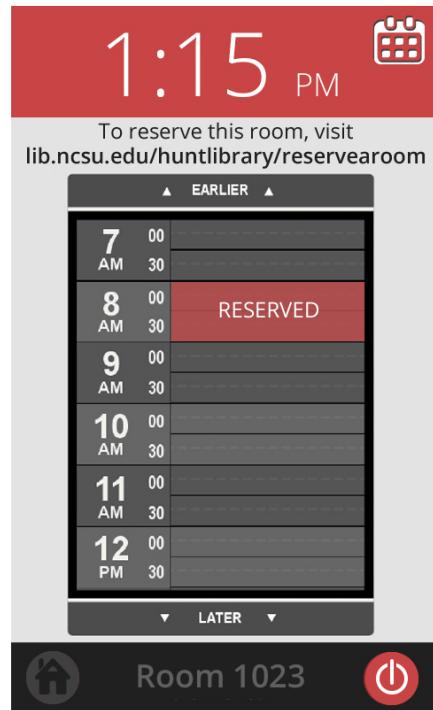

When "In Room Help" button is pushed
a pop up will show. If you select "No" you will be
put back to the Home Screen. If you select "Yes" see
next image

When selecting "YES" the pop will change to show following message and lock the screen like that for a period of time 10 to 15 sec. Then revert back to the home screen. If they hit the "in room help" button again while staff are still on their way it will revert to this same screen.

When the “calendar” button is pushed on the upper right corner you are shown the following screen.
One screen shows an example of one reservation the other shows multiple reservations.
To get back to the home screen you will hit the home button on the lower left side.

When the “inputs selection” button is hit you will be shown the below screen. The 3 examples below show what three source dcan be selected and the different aspects of the volume controls. Again to get back to the home screen you would hit the home button in the lower left hand corner.
